

## **Technology Project Manager, Delivery Lead.**

Responsible for planning, coordinating, end-to-end management and delivery of defined deliverables which will require engagement with multiple teams and stakeholders. Key responsibilities include communicating the work objectives, coordinating delivery, managing risks, ensuring compliance to standards, and providing end-to-end visibility into the project health.

This role ensures execution meets the business' requirements (scope, quality, budget and schedule).

### **Responsibilities**

- Coordinate and facilitate routines to support delivery –e.g., kick-offs, status reviews, stakeholder meetings, change controls, checkpoint milestones
- Plan and coordinate delivery across multiple teams
- Facilitate dependencies, manage risks and issues management to remove impediments the defined deliverables
- Promote communication and collaboration across organizations to support the deliverable completion and timeline
- Manage project financials, schedules and artifacts
- Gather information and provide status updates to stakeholders and leadership
- Coordinate with the Project Management Office (PMO) and ensure deliverables comply with

### **Qualifications**

- Bachelor's degree in a related field, or equivalent experience
- Good skills with project tools, like MS Project, Excel and enterprise proprietary tools.
